TERMS

Thirty days net, or two per cent discount if paid within ten days from date of invoice.

If you are not commercially rated, please send references with order or permit us to send C. O. D. by remitting sufficient amount with order to insure charges both ways.

All goods returned must have charges prepaid.

Returns—Before returning merchandise for credit or exchange, write us fully in each case, as we may desire to make other arrangements for its disposition. When returning goods, always mark your name and address plainly on the package and mail us memorandum invoice, stating date of purchase, etc.

All merchandise returned for credit without our written permission will be held subject to owner's risk.

Prices are subject to change without notice.

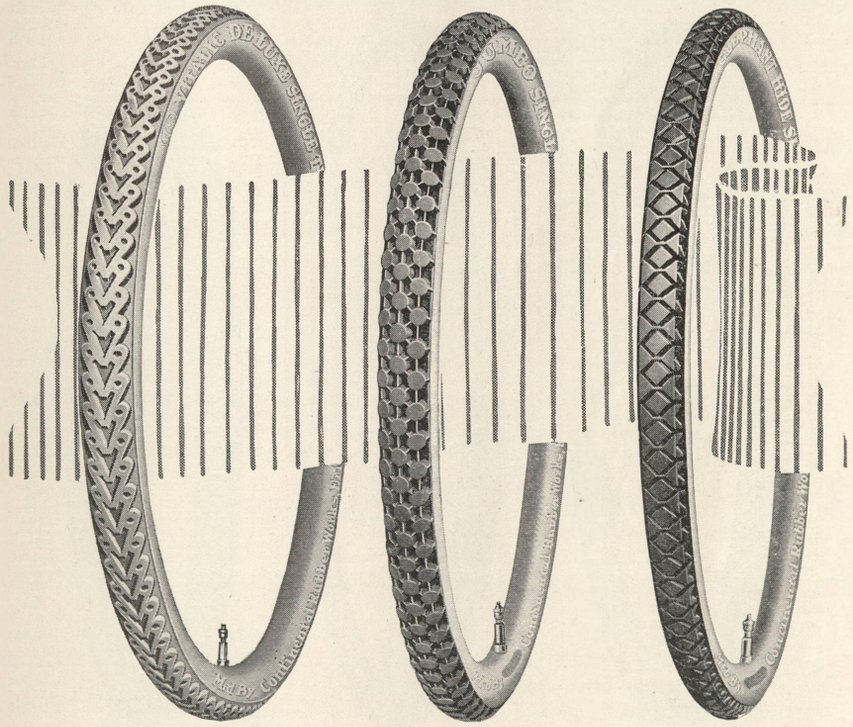
VITALIC LINE BICYCLE TIRES



Vitalic de Luxe **Jumbo** **Elephant Hide**

The Vitalic de Luxe Tire is the recognized standard of tire building. For eleven years the quality has been unchanged and this is borne out by the fact that VITALIC TIRES have never had an off year.

Furnished in sizes 28 x 1⅜, 1½ and 1⅝. Also in Juvenile sizes to fit 26 and 24" rims. Price $7.50 per pair.

The Jumbo, a medium priced tire of high grade regular fabric construction. The big, husky studded tread is carried by a strong carcass of three plies of heavy bicycle fabric, with creamy white side walls and a thick rubber inner tube.

Furnished to fit 28" rims. Price $6.00 per pair.

Every Jumbo Tire bears the Vitalic seal of Dependability.

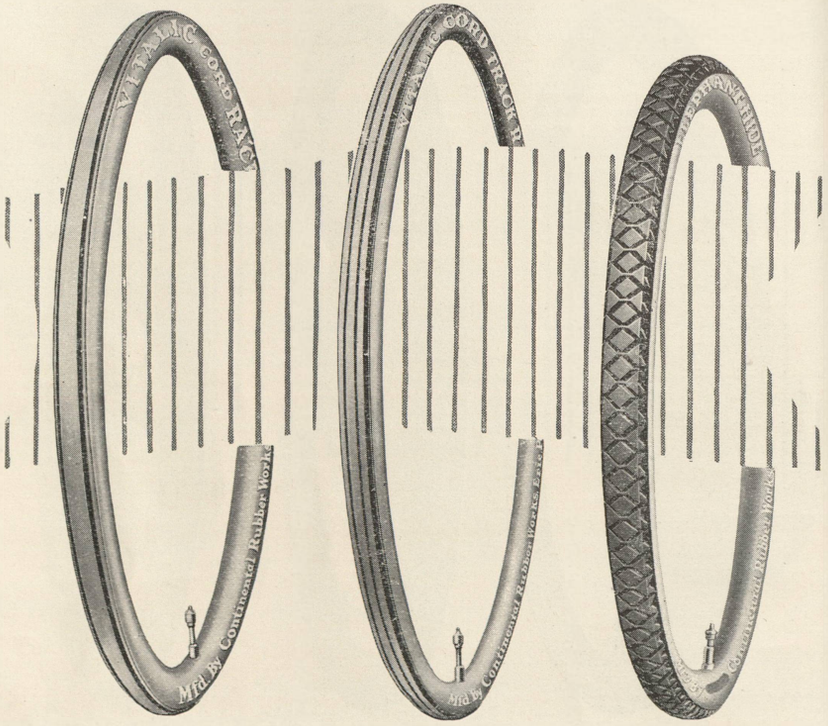
The Elephant Hide, a moderately priced tire that offers a new and improved standard of value and service for the money.

The non-skid tread, is thick, black and glistening, the side walls are white high grade rubber and tire is built with two plies of heavy bicycle fabric with an extra fabric strip on the tread, where additional strength is needed.

Furnished to fit 28" rims. Price, $5.00 per pair.

Every Elephant Hide Tire bears the Vitalic Seal of Dependability.

VITALIC LINE BICYCLE TIRES



Vitalic Cord Racer | **Vitalic Track Racer** | **Elephant Hide Juvenile**

The Vitalic Cord Racer. An over-sized racing tire of Vitalic quality, peculiarly adapted for both track and road work. This tire is built both for speed and service. Furnished in raised tread, with side ribs in sizes 26 x 1¼, 28 x 1⅛ and 1¼".

Price, $7.00 per pair.

Vitalic Cord Track Racer. Built along the same lines as the Cord Racer, except that it is made in standard racing size and with ribbed tread to prevent skidding when going at high speed around curves.

Furnished in size 28 x 1⅛.

Price, $6.50 per pair.

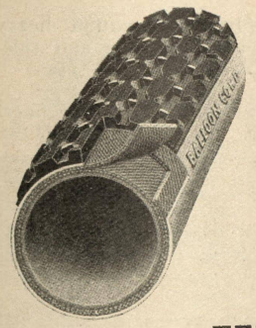
Elephant Hide Juvenile Tire. The same high grade construction exactly as the 28" construction,—furnishing a tire that will give greatest satisfaction under the severe service to which a juvenile tire is subjected. Sizes 26 x 1½ and 24 x 1⅜".

FEDERAL BICYCLE TIRES

A Standard Quality Line

FEDERAL CORD BALLOON

SINGLE TUBE



Made with two plies all around good quality cord fabric with a black tread of a very attractive design, white sidewalls and with flannelette rim strip. Constructed to PREVENT CREEPING ON RIM and to fit all 28" standard rims.

Ball Bearing Velocipedes

ROLLFAST Ball Bearing Velocipedes have been added to the well known "ROLLFAST" line of bicycles in response to an urgent request that a child's vehicle of "ROLLFAST" quality be placed upon the market. Brightly finished in Red and non-rusting nickel and equipped with the finest equipment, as shown in illustration.

SPECIFICATIONS

Frame—Made of high carbon steel bicycle tubing, ⅞ inch in diameter, giving great strength. Joints are all outside, tapered carefully, pinned and braized, eliminating the possibility of working loose.

Annular contained anti-friction ball bearings are installed at all bearing points, insuring easiest driving.

Wheels—Have solid steel rims, nickel plated bicycle wire spokes; ball bearing, all-steel hubs.

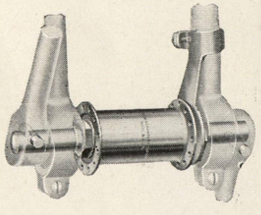
Finish—In beautiful shade of bright red, baked on, ornamented with double row box striping.—final coat of enamel gives a lasting lustre. All parts not enameled are highly polished, heavy non rusting nickel plate.

Tires—Highest grade rubber, cushion tires one inch in diameter, wired to steel rims.

Saddle—"Rollfast" specially made of best grade of leather, shaped for comfort, with cushion comfort springs, all metal highly nickel plated.

Pedals—Ball bearing, with solid rubber foot pads.

Handlebars—Drop forged extension stems, top made of first-grade bicycle tubing, highly nickel plated, and with special "Rollfast" red rubber grips.



New Departure "JUNIOR" Coaster Brake

Just as the New Departure coaster brake has for many years been a standard on all bicycles, so the New Departure "JUNIOR" coaster brake for velocipedes is now in large demand and will in a very short time be a standard equipment on all high-grade velocipedes.

"ROLLFAST" Ball Bearing Scooters

Another addition to the "Rollfast" line is the "Rollfast" ball bearing scooter. Strong in construction. Light in weight and easiest running. The frame is of steel, foot platform of hard wood of ample size, handsomely finished. Furnished with regular velocipede wheels built like a bicycle or with steel disc wheels. Finished attractively in bright red enamel, ornamented with box striping.

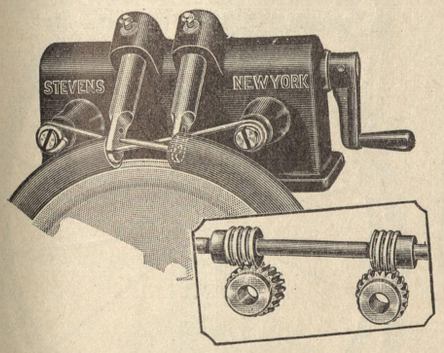
No. 10 STEVENS TIRING MACHINE



This new machine gives to the bicycle repairman the same efficiency and speed in replacing baby carriage tires, which is used in factory production. Its power, strength and design make this tool particularly suited for the large size tiring and the heavy retaining wire which are now becoming popular.

This tool is of a most practical design because the principle of worm gearing is used. The worm gearing makes this machine powerful, and at the same time flexible and easy to operate. The tension of the wire, when tightening up the tire on the machine, cannot reverse the action of the worm gearing, because the teeth of the lower gears are practically straight and at right angles with the spiral upper gears, thus locking the wire in position without the use of any ratchet or special locking devices. However, the upper spiral gears can always be turned backward or forward through the handle, so that the wire can be drawn to any tension or released by turning the handle.

Another feature of Stevens Tiring Machine is that both ends of the wire are drawn up under equal tension, which makes a smooth, well set tire.

The holding jaws are made from heavy steel bar and can be adjusted to suit the convenience of the operator or changed completely if desired.

The winding shafts are of husky diameter and fitted into large bearings. They are slotted that the waste wire can be easily removed after the tire is fastened.

HOW IT WORKS

The wire is drawn through the rubber in the usual way, after which the wheel and the tire is set up in the machine as shown in the illustration. The wire is then drawn to the necessary tension, simply by turning the handle.

The operation of twisting the wire usually causes an additional strain on the wire and often makes it break before the job is finished. With Stevens Machine, this addtional strain caused by twisting the wire is offset by backing up slightly on the handle as the twisting operation proceeds. By using the right grade of wire with Stevens Machine you can avoid entirely accidental breaking of the wire, with the result that a much tighter and better set tire is assured.

Put a good dose of heavy oil into the tiring or apply a heavy coat of grease on wire before inserting—that makes it easier both to insert the wire and operate the machine.

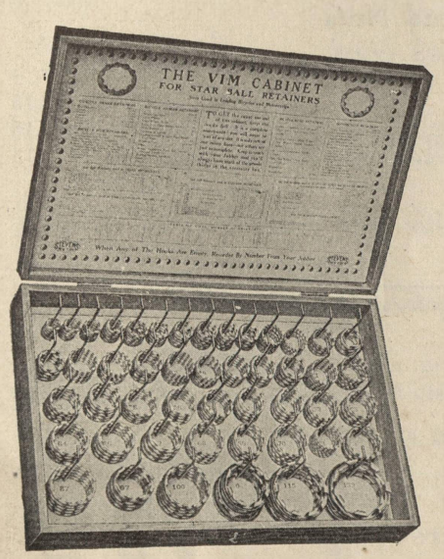
7-16 inch, per doz. 35c

We also carry a full line of larger sizes for automobile use. See Auto Catalog.



The Star Cabinet for Ball Retainers

Every Motorcycle and Bicycle dealer should have a Star Cabinet.

It shows at a glance just what stock is on hand and saves time filling orders and making repairs.

The Star Cabinet contains 52 hooks, each of which will accommodate one dozen small or 1-2 dozen large Retainers. The assortment contains all the popular bicycle and motorcycle sizes; the stock number of which is designated clearly under each hook.

In the cover of the cabinet is displayed a most valuable reference list which gives complete specifications of Star Retainers used on all standard machines.

Price, cabinet only.....$4.00

STAR BALL RETAINERS

Sizes Used by Bicycle and Coaster Brake Makers

Following is a revised list of ball retainer sizes used by the bicycle and coaster brake manufacturers. This information is up-to-date according to the best information that we have been able to obtain.

Buffalo Metal Goods Co.,
Hub—10
Brake—19—58
Other models also use 42

The Corbin Screw Corp.,
Brake—Nos. 31 and 60
Hubs—Nos. 10 and 13
Also use 1, 5, 13, 19, 21, 28, 34, 72, 76, 87 and 97

Eclipse Machine Co.,
Brake (Morrow)—Nos. 23, 55, 68
Hub—No. 13
Front Hub—No. 10
Other models use 30 and 34

New Departure Mfg. Co.,
Brake—Nos. 24 and 46
Front Hub—No. 10
Also use Nos. 4, 16, 34, 61, 67

Westfield Mfg. Co.,
Current Models—
Head—Nos. 38 and 52
Hub—No. 6
Hanger—Nos. 37 and 64
Other Models—
Head—Nos. 26, 29, 35
Hub—Nos. 5 and 13
Hanger—Nos. 30, 63

The *Consolidated Mfg. Co.,
Models—
Head—No. 39
Hanger—No. 62
Other Models—
Hub—Nos. 4, 10 and 24
Hanger—No. 58

The Crosby Co.,
Head—Nos. 29 and 36

*The Yale bicycle, formerly made by this concern, is now made by the Davis Sewing Machine Co.

The Davis Sewing Machine Co.,
Current Models—
Hub—Nos. 5 and 10
Head—No. 73
Hanger—No. 66
Other Models—
Hub—Nos. 6, 13, 16
Head—No. 29
Hanger—Nos. 58 and 59

Emblem Mfg. Co.,
Current Models—
Hanger—No. 62

Excelsior Cycle Co.,
Head—No. 52
Hanger—No. 63

Gendron Wheel Co.
Current Models—
Hub—No. 13
Head—No. 39
Hanger—Nos. 42 and 59
Other Models
Hub—Nos. 4, 21 and 28
Head—Nos. 29 and 36

Great Western Mfg. Co.,
Current Models—
Head—No. 51
Hanger—Nos. 56 and 63
Head (Reading Cycle)—No. 51 Special
Other Models—
Head—Nos. 29, 36 and 73
Hanger—Nos. 51 and 56

The Hudson Mfg. Co.,
Head—No. 36

Iver Johnson's Arms & Cycle Works
Head—No. 39
Hanger—No. 46

The Miami Cycle & Mfg. Co.,
Current Models—
Brake (Musselman)—Nos. 16 and 37
Head—No. 51
Hanger—Nos. 16 and 66
Other Models—
Head—No. 36
Hanger—Nos. 19 and 46
Brake—Nos. 13 and 37

†National Cycle Mfg. Co.,
Hub—Nos. 4 and 13
Hanger—No. 46

Pierce Cycle Company,
Current Models—
Nos. 61 and 62

Reading-Standard Co.,
Hub—Nos. 4 and 13
Hanger—Nos. 56, 60 and 63
Head—No. 36

H. P. Snyder Mfg. Co.,
Current Models—
Hub—Nos. 6, 7 and 13
Head—No. 51
Hanger—Nos. 56 and 66
Other Models—
Head—Nos. 29, 39

The Toledo Metal Wheel Co.,
Current Models—
Head—No. 39
Other Models—
Head—Nos. 29 and 36

Arnold Schwinn & Co.,
Head—No. 73
Hanger—No. 66
Hub—Nos. 6, 16

†The National Bicycle is now made by the Davis Sewing Machine Co.

COASTER BRAKE SIZES

"Old Morrow"—Use No. 18 retainers.

"Morrow"—Use Nos. 23, 55, 68 and 87 retainers.

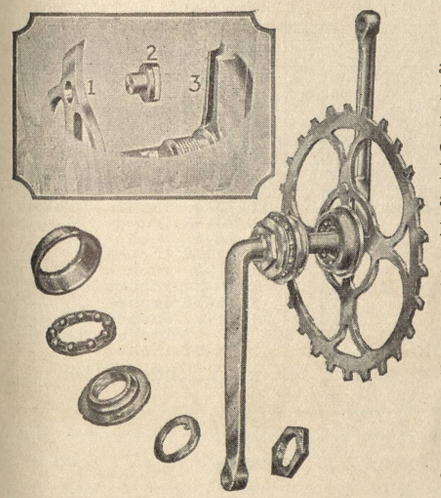
Hangers — Hubs



Any sprocket fits this patented Stevens Crank, because the Adjustable Stud (2) and the Grooved Crank (3) permit the use of any sprocket (1).

Stevens One-Piece Repair Hanger

Fits any popular one-piece bracket and all sprockets. On your next hanger job, it will please you immensely to see how quickly and precisely you can fit Stevens One-Piece Repair Hanger. So exact is the fit and so wonderful the adjustment, that you would imagine Stevens Hanger was made purposely for that particular bicycle.

Yet, to obtain this excellent fit, only five different cup and cone sizes are required for Stevens One-Piece Hanger, and these few sizes meet the requirements of all popular one-piece brackets. And you can save money on the job, too, because any sprocket now in your stock fits the patented Stevens crank perfectly. Sizes inside diameter of the bracket, 1 3-4, 1 3-16, 1 15-16, 1 31-32, 2 1-32 in.

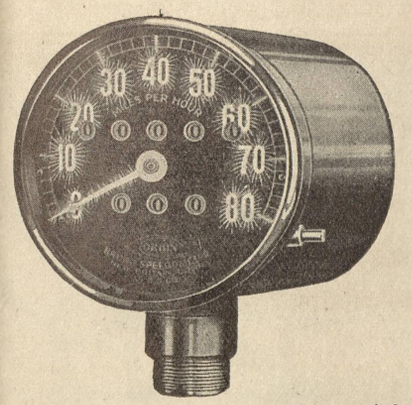
Speedometers—Speedometer Lamps, Etc.



Corbin-Brown Motorcycle Speedometers

Made in Four Models

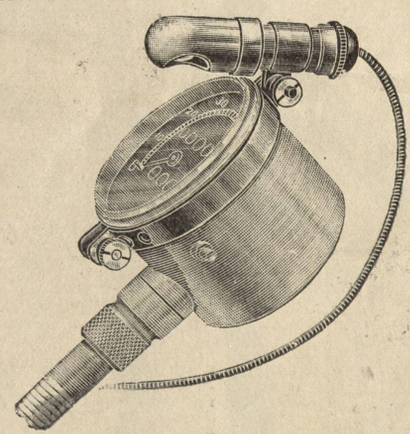
Motorcycle Front or Rear Drive.....$17.00
Same with Maximum Hand..... 19.00
Same with luminous dial..... 20.50
Same with Maximum Hand and Luminous Dial 22.50

The Maximum Speed Hand is found **only** on the Corbin-Brown Speedometer. It fills a long-standing demand for a device that will register the **highest** speed made on a long trip or a short test spurt.

The Luminous Dial—another **exclusive** Corbin feature—makes possible an easy reading of your speedometer **at night.** The hands and figures stand out clearly and show the speed and mileage **at a glance.**

SPEEDOMETER LAMP

The Matchless Speedometer Lamp can be attached to any speedometer and operated from a storage battery. Can be easily detached and used as an emergency trouble lamp. Finished in bright nickel and supplied with tungsten bulb and 2 1-2 feet armored cable. No. 300. For storage battery.....$2.00



Stevens Handle Bar Cross Rod
